**Namgyal Jangbu Sherpa**

Chhimbu Primary School was visited on 4 August 2009 when school has just started after 16 days long monsoon holiday. During the visit physical structure like Wall, new office room, nursery classroom tree nursery garden were monitored. Similarly teacher attendance, students' attendance and progress, account of the school were also monitored. Detail is given below:

School was reopened from 22 July, 09 after two week long monsoon holiday. A week after school was opened Bimsen Basnet, the headmaster was in Kathmandu and hadn't gone back to School. Mrs. Yasoda attend the school after the monsoon holiday but has gone to home again. Only Jangbu and Pasi were regularly attending the school. No sooner Bimsen heard that I was in Chhimbu he came to school two day after I was there. I have made him aware about his absent in School.

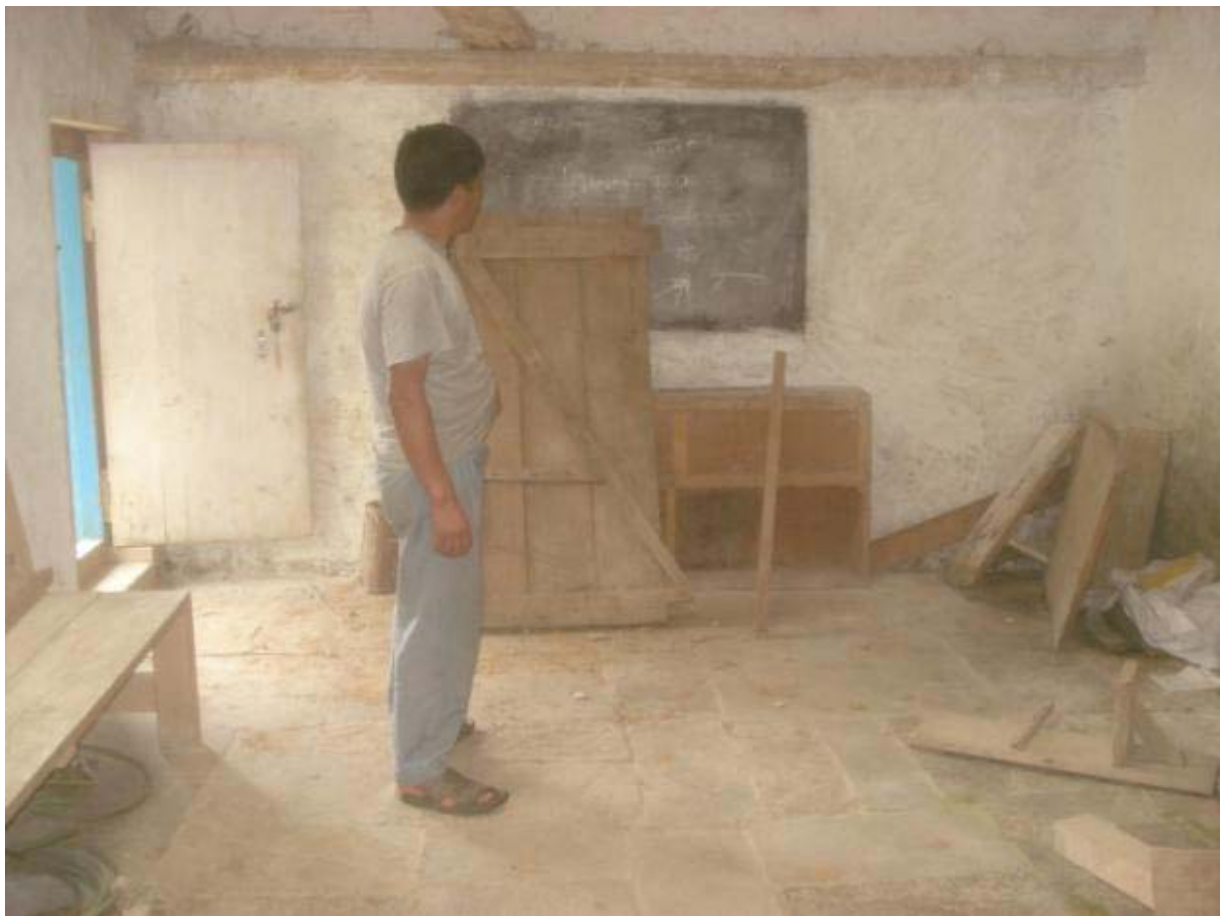

### **School building and wall around the Play ground**

Physical structure around the school is intact and safe. School has planted grass on the compound wall and supportive wall above the school which has made wall more combined and strong. During my observation I felt confident that no monsoon can damage them in future.

### **Nursery Classroom**

There is no progress in new classroom. No thing has stalled. Room is dusty and full of spider net. Waste of the furniture also stored there. It needs to be removed and room need to be cleaned and decorated. I have drawn teachers' attention about it. They have assured me that they will clean up the room and bring in to use.

### **Tree Nursery**

Tree Nursery is coming up. School peon has dugout the mud and cleaned the bush. She has planted some seasonal flower as well which will bloom in the autumn. Numbers of juniper tree are planted in the garden and they are growing up. Amount of stone pebbles were in the garden last time which were picked up and hasn't seen this time.

### **Toilet and Water Tap**

Condition of water tap and toilet is very poor. Water tap is kept always opened and all the dirty water is getting collected around the water post, and bush has covered and blocked the way to toilet. I have directed teachers and peon to avoid all the dirty water and clear the way and keep the toilet running.

### Garbage Management

Dust management at the school is very poor, there is no management system. Garbage were thrown in the garden just above the toilet and water post and they are spread out all over. I ask Jangbu to dig a hole and control the garbage.

**Chhimbu Woman Progressive and Activities:**

Chhimbu woman progressive woman group is now planning to buy fabric for sewing new dress. Students are using used one and they are going to have new dress after 2 weeks or so. Woman Group has collected Rs.19.550 and Rs.5.700 is yet to be collected from the dress. From this money they will buy new fabric for the new dress. But they will not neat the sweater because it is going to be expensive and no parents want to buy expensive sweater. Bishnu Maya felt in ill for long time, she had to go to Kathmandu for treatment which has delayed sewing dress.
