Progress Report of the Solu Scholars

Scholarship account book of each scholar was checked during the runner service. Most of the scholars were found not to have updated accordingly, some even haven't written anything in account book, and I once again taught them. I also ordered teachers to check if they are filled if not ask them to fill; I have pushed both teachers and scholars vigorously to bring account book in effect and keep update. I couldn't take the personal information of each scholar this time; however, I checked the progress and attendance of the scholar in general with the help of headmaster and class teacher. In general report I found their attendance is regular and most of the student are improving in their class activities as well as learning. But some scholars still haven't picked up their learning and they are under average although they are regular in the school, their names are following:

Name of the Scholar	School	Class	Attendance	Hygiene
