

# Upper-Solu Survey 2000

In September 2000 a general demographic survey was carried through in Beni VDC, Upper Solu, in Mopung, Junbesi, Trakdobuk and Kamche Wards.

33 households were interviewed involving 452 persons.

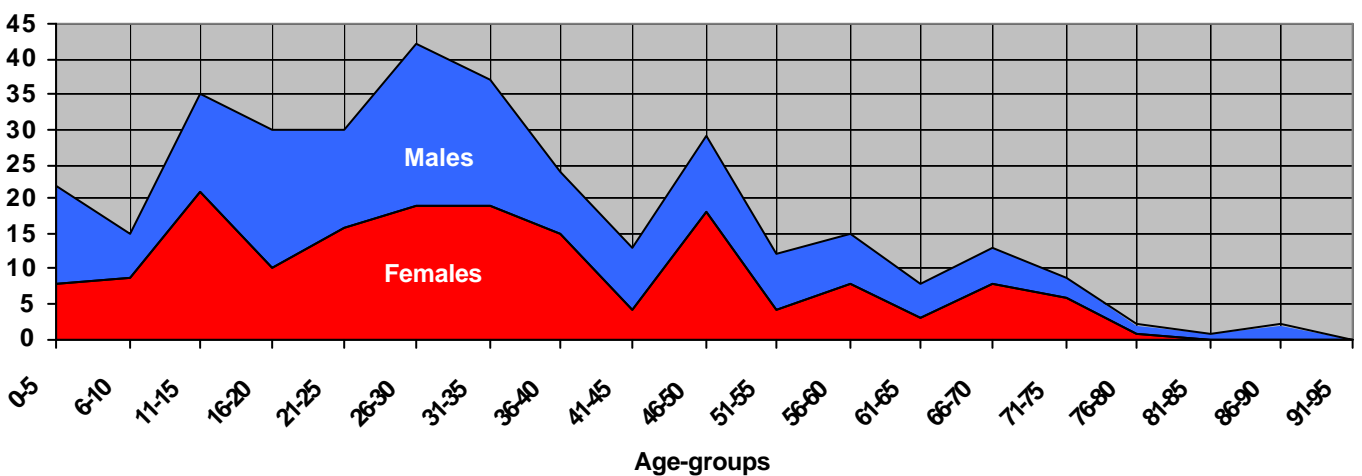

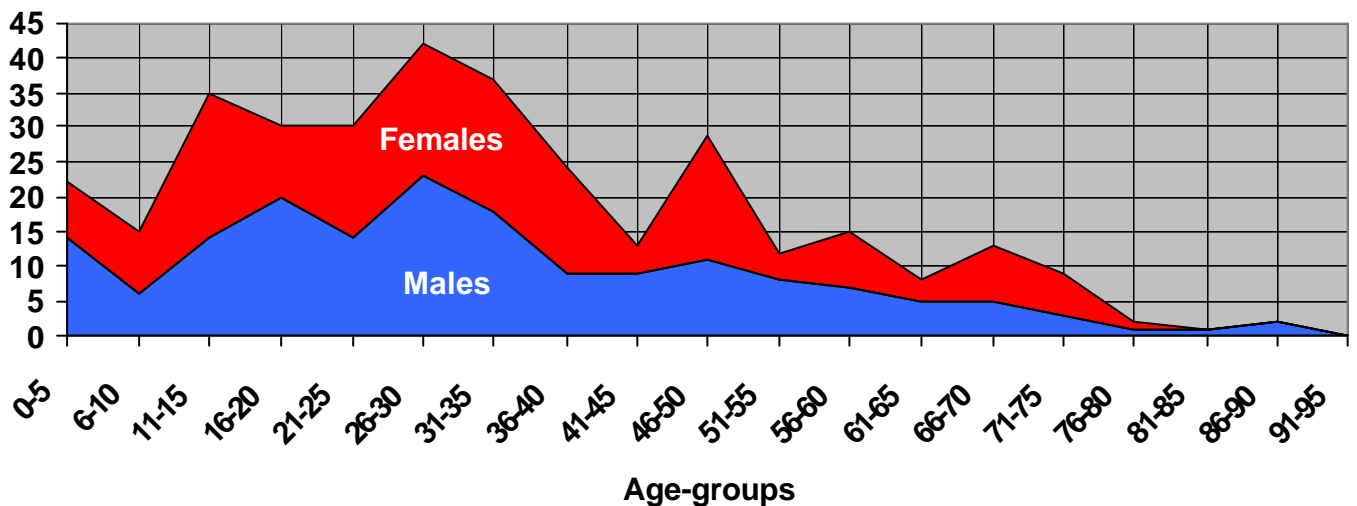

The central person in the household was the owner of the house - the one who has inherited the house.

In this way the persons involved is the persons born in the house or married into the house.

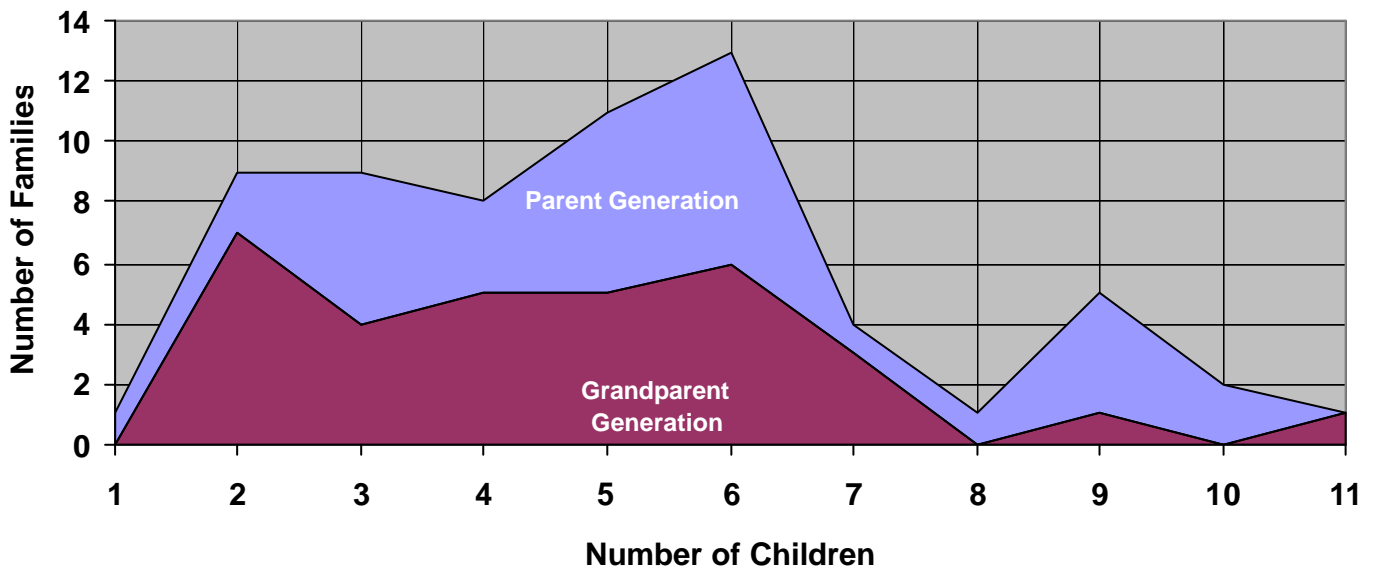

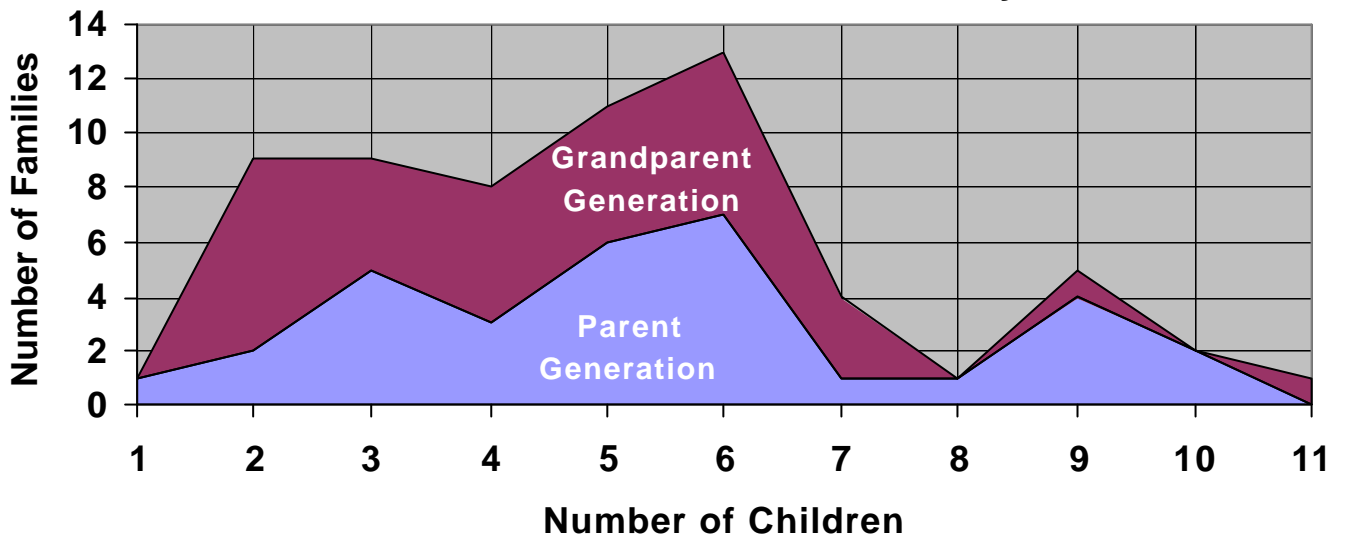

Because of lack of experience in working with databases, the results of the survey is not completed.

The base of knowledge is complete, so we are only waiting for someone with knowledge and energy.

Agedistribution among all born in the surveyed houses

### Number of Children in each Family

## Persons who have received Primary Education (1.-10. class)
