

## UPPER SOLU HIGHER SECONDARY TECHNICAL SCHOOL with STUDENT HOSTEL at CHHEDING

HOSTEL COMMITTEE  
November 2006

Although this new school concept is still not existing and only in “Phase 1: Preparation”, a committee shall be formed to work with the management problems of the Students Hostel, which will come when the school is completed after some years. It is important that the population of Upper Solu is taking part of the decision processes already from the very beginning. It is important for the development of ideas and management concept, that it is taken into consideration, how parents and professionals want this Hostel to work, before decisions are taken which are not fully working in favour for local ideas and concepts. It shall be kept in mind, that the new school and Hostel belongs to the society, and that it shall serve the societies of Upper Solu for many years ahead.

The committee can be elected among parents and teachers in Junbesi, but should also have representatives from other parts of Upper Solu, which is the four VDC's of Beni, Thamakhani, Bakanje and the Ringmu part of Trakshindu.

The works of the committee shall be coordinated to the needs of each Phase of the construction. This work shall be in support of the Project Coordinator Papa Kurt, who need the input of the committee to fulfil his work with the Project Description, which finally shall lead to applying donors for the necessary funds for completing the project.

In “Phase 1: Preparation” the committee shall specify what are the needs for the students and teachers in the Hostel. Most important is to give an idea about how the hostel can be run after completion. The hostel has to run by hostel fees by students and parents. Instead of each student cooking own food it should be cooked in a common kitchen. This feeding should also be paid by hostel fees. There shall be made a report on the estimated costs in running the Hostel, and estimated hostel fees. But also reporting suggestions on how the Hostel should be run practically.

The committee shall perform workshops and discussion meetings in all the four VDC's to explain the Hostel project, to take suggestions and to sense the interest among the population and taking ideas how the people of Upper Solu can support this Hostel.

The committee shall give detailed, sufficient and timely reports for Project Coordinator Papa Kurt. By email there shall be discussions on the reports.

The project can't proceed into “Phase 2” before Project Coordinator has received sufficient information's and suggestions from Hostel Committee's side. Actually the activities from local side will be the activating factor in the further development of the project.

In the hope of good cooperation and sincere involvement.

Junbesi on 3. November 2006
